APPLICATION

This aluminium profile is fixed around the perimeter of the deck to hide the visible sides of the posts and deck boards or slabs. It is screwed onto Buzon pedestals or Buzon E-BRS joists.

As well as giving the terrace a clean, modern look, it contributes to safety by preventing the risk of falling or catching on the edges. The edge profile also ensures greater durability by protecting the materials from the elements.

SAFETY INSTRUCTIONS

Buzon pedestals and accessories are designed to support raised floors used only by pedestrians. They cannot support or be subjected to moving or vibrating machinery and equipment. This includes cars, maintenance vehicles and similar equipment.
