Bespoke

APPLICATION

This aluminum extension attaches to the lower part of the U-TFP to increase its height. The Extender slides underneath the U-TFP into a specially designed rail.

In addition to giving the deck a sleek and modern aesthetic, it contributes to safety by preventing the risk of falls or snagging at the edges. The edge profile also ensures greater durability of the entire structure by protecting the materials from the bad weather.

SAFETY INSTRUCTIONS

Buzon pedestals and accessories are designed to support raised floors used only by pedestrians. They cannot support or be subjected to moving or vibrating machinery and equipment. This includes cars, maintenance vehicles and similar equipment.

Buzon has a policy of continuous improvement and reserves the right to modify, revise or change the above specifications without notice. This technical data sheet is for descriptive purpose only and is based on the product as on the date of publication of this information.
